

## Product information

Extra large format stitch, fold and trim accessories.

The new BME bookletmaker which can be connected to the C.P. Bourg® BSTd+ and BSTe tower collators and later as well to large format digital printers.

The new BME is new from the ground up, and has many unique features:

- Total NC control (no knobs to turn or levers to move like others have)
  - Totally visible paper path which is important to many printers
  - Possibility to control the accessory from a remote source like collator or printer, (all others have to have 2 separate control panels)
  - Capability to handle the largest range of formats for any collator or on line accessory
  - Input size up to 370 x 600 mm (will take iGen3 production)
  - Capable of handling landscape A4 brochures, as none other can
  - New soft handling paper path especially designed for digital prints that can be marked or scratched very easily
- \* Rock solid frame

- Fully automatic with full color touch screen control panel (unlike b+w limited controls of other makes).
- Folds up to 30 sheets at a time (70 gsm). Available with 1 to 4 standard or cassette wire heads.
- Topstitch with bypass exit.
- A4 landscape booklets are possible.
- Special feeding allows markless handling of digitally printed sheets.
- Fully automatic fold roller and unique booklet crusher belt technology.
- Super heavy duty front trimmer with blower.
- Square edge spine accessory option.
- Centered process.
- Fits d+ systems.
- Visible, straight paper path.
- Book kicker standard.
- Centered process.
